Yasin Hadimli

Cyber Security | SOC Analyst

Professional Summary

Motivated cybersecurity candidate focusing on SOC and Security Engineering roles. Possesses foundational knowledge of Networking and Network Security, actively improving technical skills through hands-on practice and training while preparing for international cybersecurity certification exams and cyber security platforms. Highly motivated to build a strong career and grow into advanced security roles.

Work Experience

Restaurant Staff, Apo Restauracja, Poland/Warsaw

Dec 2024 – Present

- Assisted the head cook / teamlead at the food counter by supporting food preparation and service operations.
- Maintained order, hygiene, and workflow efficiency during peak hours in a fast-paced restaurant environment.
- Provided consistent customer service support while ensuring team coordination and operational standards under pressure.

Warehouse Worker, Żabka, Poland/Warsaw

Dec 2023 – May 2024

- Worked in warehouse operations including picking, packing, and inventory handling.
- Used barcode scanners and warehouse systems to ensure stock accuracy.
- Supported team coordination during high-volume periods.

Team Lead / Production Supervisor, ERHA – Performance Stickers, Konya/Turkey

Sep 2019 – Sep 2022

- Managed daily operations and end-to-end production workflows, from Adobe Illustrator design files to final product delivery.
- Prepared and optimized design files for CO₂ laser cutting machines.
- Operated and supervised CO₂ laser cutting of PVC banner materials (0.3 mm and 0.5 mm thickness).
- Led the production team as Lead Operator, ensuring quality control, workflow coordination, and on-time delivery.
- Improved operational efficiency by optimizing production processes in a fast-paced manufacturing environment.

Certification

Certification, EuroTechStudy

Feb 2025 – March 2026

Technical Skills – Projects

LetsDefend

Performed detailed analysis of security alerts as a SOC analyst by reviewing logs, analyzing suspicious behavior, correlating IOCs and CVEs, and accurately classifying incidents.

Atomic Red Team

Identified threat actor techniques using Atomic Red Team, mapped detected activities to the MITRE ATT&CK framework, and visualized TTPs using ATT&CK Navigator. Developed a custom automation to execute Atomic Red Team tests and integrated a GUI to improve usability and workflow efficiency.

Cyber Threat Intelligence

Prepared up-to-date Cyber Threat Intelligence (CTI) reports for my own publication, enriched with validated Indicators of Compromise (IOCs) to enhance threat detection.

VirusTotal-API Integration

This project is an analysis bot that I developed to automate IoC output. This bot analyzes IP addresses, domains, and file hashes provided by users via the VirusTotal API, processes the results, and automatically generates Excel reports.
